

VARANASI SIVA RAMA KRISHNA

Data Analyst — Data Management, Analytics & AI

+91 9391861893 | sivaramkrishna2410@gmail.com | github.com/Sivaram1024 | linkedin.com/in/sivaram2410

PROFILE SUMMARY

Final-year B.Tech Data Science student experienced across the full data lifecycle, from ingestion and cleaning to stakeholder-ready reporting. Proficient in Python, SQL, Snowflake (data warehousing), Power BI, and Tableau, with NLP/LLM project experience. Skilled at decomposing problems into analytical/statistical models, modelling workflows as finite-state processes, and documenting data-management decisions for SOP-based, compliance-driven environments, aligned with AI Kosh's data governance objectives.

TECHNICAL SKILLS

Languages & Querying: Python (Pandas, NumPy), SQL, Java, C

Data Management: Data cleaning & verification, quality assurance checks, schema design, data pipelines, MySQL, MongoDB, Snowflake (data warehousing)

Analysis & Visualization: Statistical analysis, Power BI, Tableau, Matplotlib, dashboarding & automated reporting (Power Automate)

AI & NLP: NLP, LLM integration (Google Gemini API), Generative AI (Oracle OCI), resume parsing, Telegram Bot, Render (deployment)

Tools & Platforms: Excel/Google Sheets (Macros), MS Office, SharePoint, Git/GitHub, Jupyter Notebook, Postman (REST APIs)

RELEVANT EXPERIENCE

Data Analytics Intern — SmartInternz (APSCHE Govt.-recognised) Jul - Aug 2025

- Engineered 1-2 interactive Tableau dashboards surfacing statistical patterns in large, complex datasets for stakeholders
- Managed the data lifecycle across 4 stages (ingestion, cleaning, transformation, visualization) to deliver end-to-end reports
- Applied statistical validation checks to flag data-quality issues before delivering 1-2 dashboards, per SOP-based standards

Data Specialist Intern — Technical Hub Pvt. Ltd. May - Jun 2025

- Built data pipelines and applied analytical/algorithmic models across cross-functional workflows to support data-backed decisions
- Translated business requirements into data-driven solutions; documented 2 areas: technical work and data-management decisions
- Collaborated with 1-2 cross-functional teams on automation initiatives, designing algorithmic logic for recurring workflows

AI & DATA PROJECTS

ATS Resume Screening & Ranking Chatbot — NLP & LLM Candidate Matching (Python, Gemini API, Telegram Bot, NLP, Render)

- Created an AI-powered Telegram chatbot that screens multiple resumes against a Job Description, extracting 3 data points: skills, qualifications, experience
- Implemented a weighted ATS scoring engine delivering 5 outputs: candidate matching, gap analysis, missing skills, learning recommendations, ranking
- Designed a 3-stage pipeline (extraction, Gemini semantic analysis, scoring/ranking) deployed via Telegram Webhooks on Render

Placement & Skill Gap Analytics Platform (Power Apps, SharePoint, Power BI, Power Automate, AI/LLM)

- Developed a placement platform integrating 5 tools end-to-end (Power Apps, SharePoint, Power BI, Power Automate, LLM) to track skills and calculate readiness
- Modelled the approval and readiness workflow as a finite-state process, using truth-table-based logic to automate Power Automate notifications
- Integrated LLM-based resume parsing to match candidate skills to job requirements, feeding 2 outputs: personalised recommendations and Power BI dashboards

EDUCATION

B.Tech — Data Science, Aditya College of Engineering and Technology, Kakinada

2023 - 2027

CGPA: 7.78 / 10.0 (77.8%) — Ongoing

CERTIFICATIONS

- Oracle Certified Professional - Generative AI on Oracle Cloud Infrastructure — [View Certificate](#)
- Microsoft Certified: Power Platform Developer Associate — [View Certificate](#)
- SnowPro Associate Platform Certification - Snowflake — [View Certificate](#)
- Data Analytics Job Simulation Certificate - Deloitte — [View Certificate](#)
- Getting Started with Data - IBM SkillsBuild — [View Certificate](#)
